

What ingredients make bread rise?

Choose a pair of ingredients to test, and find the box in the table.

Add the number to a tube, and add 1ml each of the two ingredients.

Add warm water to the tube, up to 7ml. Stir gently to mix.

Wait 5 minutes.

Write in each box whether gas is formed, and how much.

| | salt | flour | sugar |
|-------|------|-------|-------|
| yeast | 1 | 2 | 3 |
| sugar | 4 | 5 | X |
| flour | 6 | X | X |
