

Name _____

Measuring plants in the butterfly garden

1. How many hand lengths is the rock?

Write the length next to the rock on the map.

2. Use finger widths to measure the width of a tree trunk.

Draw the tree on the map and write its width next to it.

3. Find a plant less than 1m high. Measure it with a metre stick.

Draw it on the map and label it with its height.

4. Find a plant at least 1m high.

Estimate how many metres high it is.

Draw it on the map and label it with your height estimate.
